Technology consulting

E-stance develops breakthrough products and provides business consulting in technology critical issues for clients.

Design and branding:

e-stance is a company that also focuses on creating high end custom design and development solutions for many leading brands and companies the world over. Set up with a mission to fill a serious void of originality and discipline amongst local service providers we quickly set ourselves apart with our breakthrough design concepts and were amongst the first of our time to adopt new technologies.

Estance provides design solutions such as, logo branding, brochures, advertising and all print media design and development.

Web solutions:

e-stance offers unique web designing services. We excel in creating websites which are easy to navigate, beautiful graphics and comprehensive. We have created and launched many successful sites since our inception for various types of business. Our work team consists of creatively and technically brilliant web designers who can appeal to your sense of style and work towards turning your ideas into reality.

Product engineering

"Product engineering is a discipline which deals with Design and Manufacturing of a Product."

Product engineering deals with the issues of cost, productivity, quality, performance, reliability, serviceability and user features to make the resulting product attractive to its intended market and a successful contributor to the business of the organization that intends to offer the product to that market.

Business optimizing solutions

Our goal is to help our clients to optimize their business performance.

By balancing and aligning business priorities and IT processes, IT optimization solutions can help achieve both of these goals

Software testing

Software testing helps to find bugs in a project with the knowledge of Software Testing, Testing Tools and Techniques, approaches and methodologies.
